

# Climbing balancing unit "Small jungle"

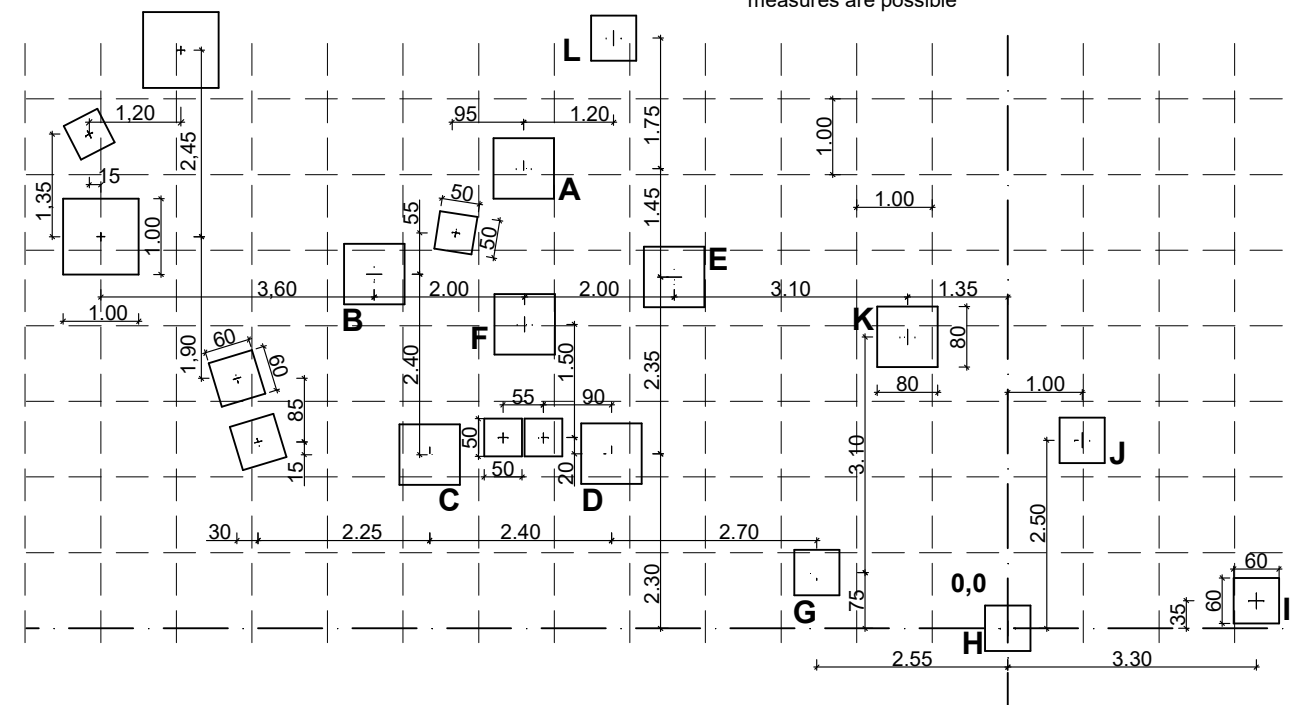

perspective  
-without scale-

topview with  
minimum safety area

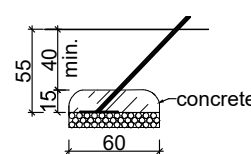

foundation plan  
check measurements  
on building site  
because of crooked trees different  
measures are possible

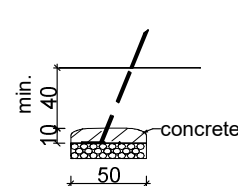

foundation detail  
without scale  
minimum soil class III; check compression  
or make foundation bigger

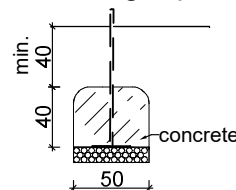

slanted net entrance

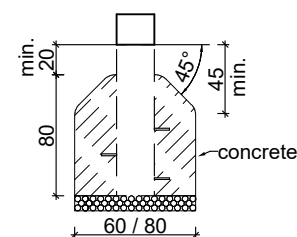

rope ladder

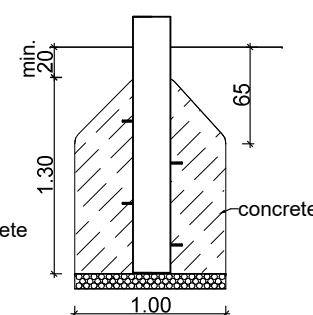

climbing rope

pole

pole

The minimum area must be free of obstacles to/on which the user can during his movement unexpectedly fall or crash. Hard and sharp objects, as well as trip-surfaces count as obstacles.
