Combi. 03 - Product Specification

## Combi - Greenville rope play house combination

Combi. 03 - Big Greenville Rope-play house with a spatial net (rope diameter $Ø 18 \mathrm{~mm}$ ), bamboo panels, and a curved Banister including a lookout with two access nets, connected by a short rubber bridge.

## Combi. 03 - at a glance.

## Technical Data.

The following text can also be used for tenders.

- Bam. 01 with an elevenfold suspended spatial net, bamboo panels
- Splash with Rope ladder, climbing rope, two access nets
- Flubber bridge

## Tube framework:

A combination of straight and bended stainless steel Frameworx®tubes, $\emptyset 60.3 \mathrm{~m}\left(23 / 8^{\prime \prime}\right)$; the tubes are connected to build an oblated icosahedron space framework

## Nodes:

Frameworx-aluminum ball connectors; $\varnothing 250 \mathrm{~mm}$ (9-13/16"); anticorrosion treatment and color finish: sandblasting and solvent-free zinc-/ epoxy-/ polyester-process; incorporating an ASTEM TT net tensioning system; securely closed with durable EPDM- caps

## Ropes:

U-Rope ${ }^{\circledR}$ round strand ropes with galvanized and covered wires; external strands with non-abrasive UV-resistant Polyester-yarn (no Polypropylene): 18 mm (11/16")

## Spacial netting:

Rope crossing points are localized with durable, forged aluminumalloy cloverleaf rings and forged aluminum-alloy ballknots (no plastic connections); in situ-replaceable rope strands (no special tools required); rope Ø 18 mm (11/16")

## Bamboo panels:

Bamboo strips 90 mm , (3 1/2") mounted at a particle board made from HDPE, $19 \mathrm{~mm}\left(3 / 4^{\prime \prime}\right)$ thickness, rounded edges, mounted with aluminum plate clamps to the tubes of the framework

## Steel posts:

Steel pipes $\emptyset 133 \mathrm{~mm}\left(5^{\left.1 / 4^{\prime \prime}\right)}\right.$ with a rounded cast aluminum post top, minimum wall thickness $7.1 \mathrm{~mm}\left(1 / 4^{\prime \prime}\right)$; anticorrosion treatment and color finish: sandblasting and zinc-/ epoxy-/ polyester-process.

Cross tubes made of stainless steel Frameworx-®ubes, Ø 60,3 m (2 3/8"), material AISI304 (DIN 1.4301).

## Connecting parts:

Two-part cast aluminum connecting Terranos-clamps for the height-adjustable connection of rope elements or steel pipes to Terranos steel posts.

All connections for Terranos-rope elements are equipped with FroxRope connections that are completely enclosed and free from any entrapment risks.

## Climbing netting:

Rope $\varnothing \square 16 \mathrm{~mm}(5 / 8$ "), mesh size $300 \times 300 \mathrm{~mm}$ ( $1-13 / 16$ "x11$\left.13 / 16^{\prime \prime}\right)$, rope crossing points localized by durable, drop forged aluminum-ballknots (no plastic).

## Climbing rope:

Rope $\varnothing 21 \mathrm{~mm}$ ( $13 / 16^{\prime \prime}$ ), vertical rope with worked-in ebonite cylinders, distance between cylinders $250-300 \mathrm{~mm}$ ( $9-13 / 16$ " to 11 13/16").

## Handrail rope:

Rope Ø $16 \mathrm{~mm}\left(5 / 8^{\prime \prime}\right)$, rope ends are fixed with cast aluminum Terranos clamps (to the outer steel support).

## Flubber bridge:

Laying surface comprised of durable, vandal-resistant conveyor belt material.
