**BENCH BONN WITH BACKREST**

**AP032**

Finitura /Finishing

**GALVANIZED AND POWDER COATED**

Bench with backrest, simple and sturdy can be inserted into pedestrian paths while still allowing a good cleaning of the occupied space. It's made of metal and wood.

The bench consists of two 60x60 mm tubular side supports prepared for anchoring to the ground, while plates are welded to the top for fixing the boards.

The seat and back are formed by wooden slats with sect. 43x55 mm, fixed on flat supports.

The slats can be made of pine wood, impregnated in an autoclave, or fine wood.

A central reinforcement is also attached to the seat and backrest to give greater stability and linearity to the planks.

The metal parts are galvanized steel and painted with thermosetting polyester powders in the various RAL colours.

The hardware is made of stainless steel.

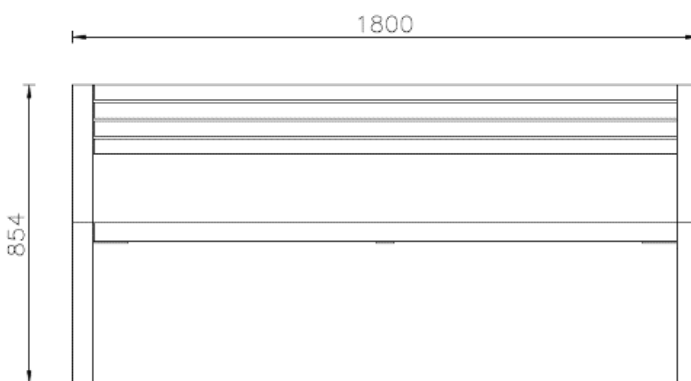

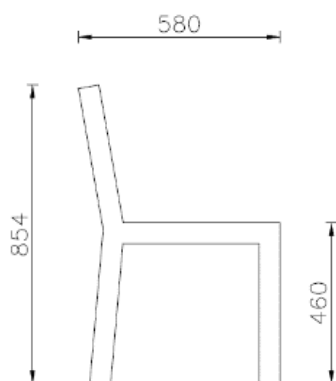

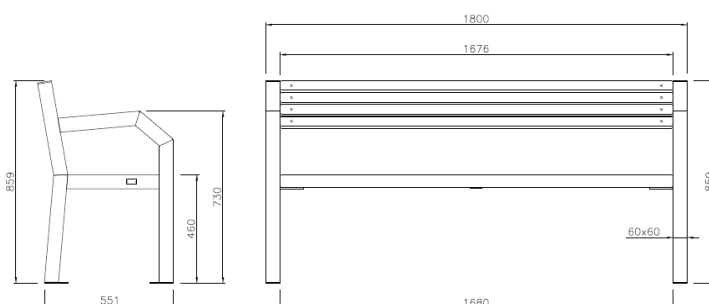

On request, the bench can be supplied with armrests.
