**BENCH ATHENA WOOD WITH BACKREST**

**AP015**

Finitura /Finishing

**GALVANIZED AND PAINTED**

Bench consisting of two sturdy, laser-cut steel side shoulders welded onto elliptical 600x150 shaped bases prepared for fixing the bench to the ground with expansion bolts.

Seat with backrest consisting of 15 Nordic pine slats (13 of section 55x45mm and 2 at the ends of section 92x45mm) impregnated in an autoclave to protect the wood against fungal attack, mould and atmospheric agents, fixed on three supports, one central and two lateral ones welded to the shaped side supports.

On request, the bench can also be supplied in high-quality wood.

The seat is fixed to the shoulders with screws.

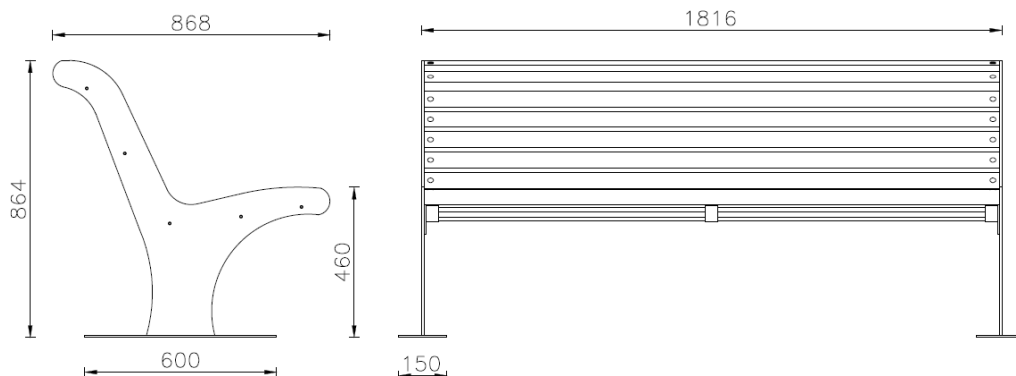

The metal parts are galvanised and painted with thermosetting polyester powders in the various RAL colours.

All hardware is made of stainless steel.

## TECHNICAL INFORMATION

Dimensions 1816x868 mm

Height 864 mm
