KineticSpinner

Can you imagine a playground without a carousel? Of course not!

That's why Playnetic developed its own. This KineticSpinner is an indispensable piece in our traditional collection. Turning the KineticSpinner now generates super sustainable Human Powered Energy. This energy is used to create music and an awesome lightshow with interactive LED lighting. The heavy duty steel material and durable powder coat finish means that this carousel will stand up to the elements to provide fun for years!

Changing songs on the carousel is very easy. Simply insert a USB stick with .mp3 music files, start using the KineticClimber till you hear "uploading data completed, please remove USB device." It's that simple.

Smash the button to skip to the next song and to change the color of the LED.

All Playnetic products are 100% Human Powered. The user generates the energy. There is no need for external electricity or batteries.

All Playnetic products enhance the playing experience through beautiful audio design.

All Playnetic products are weather resistant.

Playnetic products can enrich the playing experience through LED lighting technology.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Several Playnetic products have a removable USB stick with .mp3 audio files. This allows for easy customization and new content.

All Playnetic products use .mp3 coding format. This is a universally used file format for audio. It allows for easy customization and content creation.
