**BENCH PORTO**

**AP056/AP056P**

Finitura /Finishing

**GALVANIZED AND POWDER COATED**

Bench Porto has a simple design, but it is very robust; it can be realized with or without backrest.

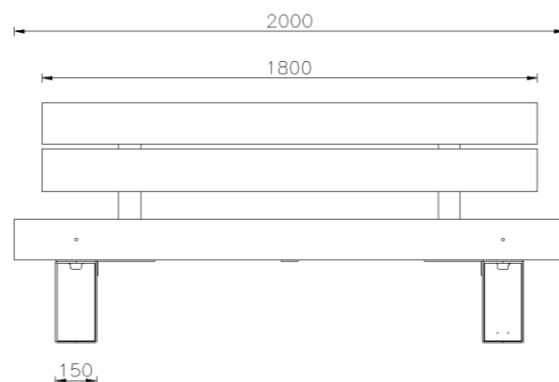

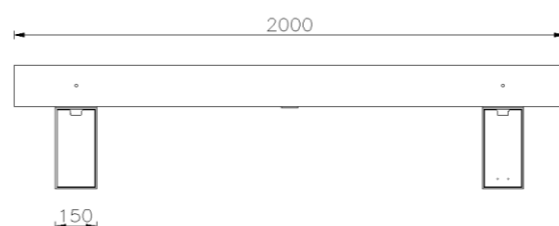

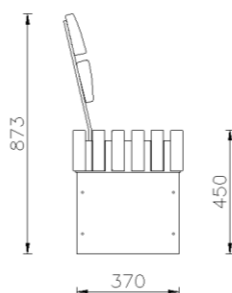

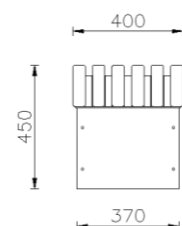

The bench is composed of two steel sheet supports, closed by a frontal lid that can be opened for ground anchoring, above which a pierced plate is fixed for slats fastening. The seat is composed of 6 slats with sec. 45x140 mm. In the version with backrest, slats are directly fixed to the seat through two steel laser-cut supports and are shaped in order to be ergonomic.

This bench can be anchored to the ground with bolts. Slats can be supplied both in pressure-treated pine wood or hardwood. All metal parts are galvanized polyester powder coated and are available in different RAL colours. Stainless steel screws.

If required, the bench can be provided with armrests, like in the picture.

## TECHNICAL INFORMATION

Dimensions 2000 x 400 (backless)  
2000 x 436 (with backrest)  
Height 450 mm (backless)  
873 mm (with backrest)  
Approximate weight 82 / 106 Kg
