BIKE RACK GAMMA WITH PLANTERS

AR032 A/B/C/D

Finitura /Finishing

GALVANIZED AND POWDER COATED

Bike rack consisting of a rack of \varnothing 22 mm tubular steel elements, suitably shaped and rigidly welded to two horizontal round steel tubing \varnothing 48 mm.

On the sides, the bike rack is supported by two 5mm thick shaped steel plates welded to the \varnothing 48 tubulars which, with holes provided, allow fixing to the two concrete planters (550x450xH.380 mm) which act as lateral supports.

It can be supplied in the 3-, 5-, 7- or 9-seater version. In the 9-seater version, the rack is divided into 2 components joined by 2 plates in the centre, which give greater support to the bike rack.

All metal parts are galvanized and coated with thermosetting polyester powders in different RAL colours.

The screws are made of stainless steel.

It can also be made for the Alfa bike rack and Spirit bike rack versions.

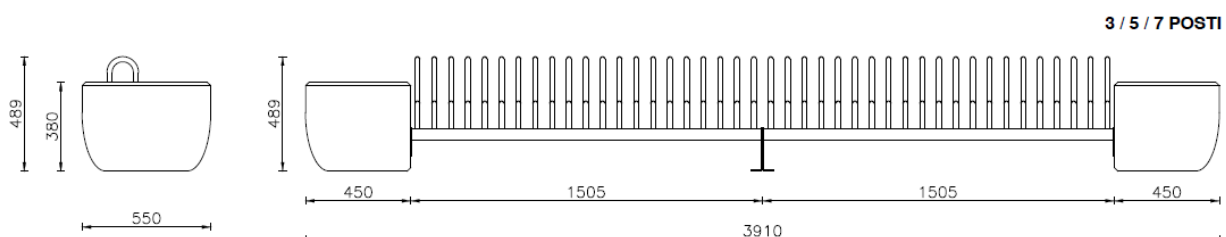

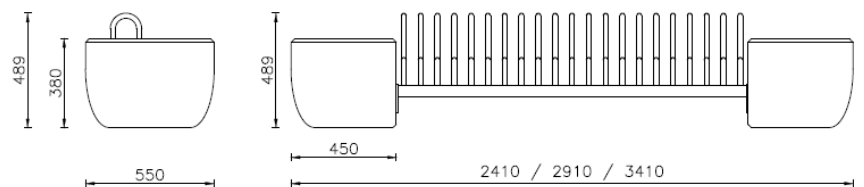

Simple but functional, suitable for places where it is not possible to fix it to the ground.
