GALVANIZED AND POWDER COATED

Cover made from tubular steel support columns.

The load-bearing columns supporting the structure are fixed to the roof made of honeycomb polycarbonate.

The structure is fixed to the ground with base plates each sized by means of anchor bolts.

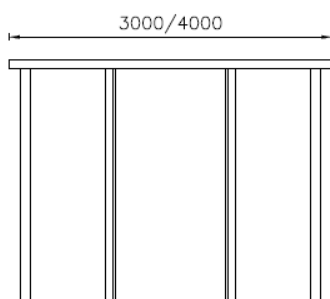

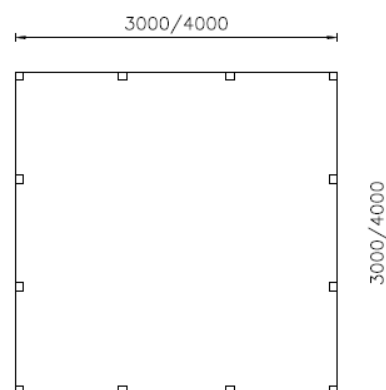

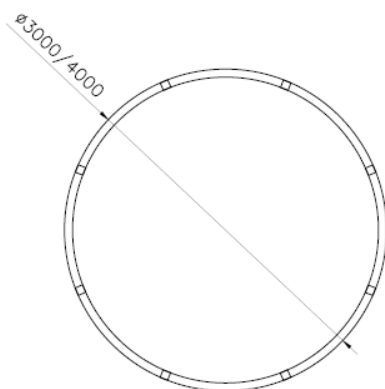

All metal parts are hot-dip galvanized and painted in the various RAL colours.

The hardware is made of stainless steel.

On request, it can also be supplied in circular, square and octagonal versions.
