Design – Johan Lindstén

JOHANSON

Introduction

It has long been an ambition to create a chair that offers the very best in seating comfort and yet is not only lightweight and stackable, but also made from recycled materials. Pelican which was launched spring 2020, designed by Johan Lindstén, and is a sleek-looking chair with gently rounded lines produced by recycled plastic materials.

Pelican is the first chair in Sweden to be awarded the EU Ecolabel and is the answer to many customers'

wishes, while challenging attitudes on the choice of materials at a time when sustainability and environmental issues are high on the agenda. We consulted with experts from the plastics, recycling and manufacturing industries at an early stage of the development process, using their collective input to create the best possible foundation on which to build a successful project. The recycled plastic comes from a Swedish supplier.

Pelican - a sleek-looking chair with gently rounded lines produced with recycled plastic materials, and is the first chair in Sweden to be awarded the EU Ecolabel.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 400 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 192 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome or polished aluminum are offered.

For all colours see www.johansondesign.com

192 Solid collection (gloss 72)

192 Structure collection (matte, textured surface)

15 Pearl finish collection

Chrome (08, 09- base)

Polished aluminum (03-base).

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.

Material declaration

For more information about the product please download material declaration on our website, under Downloads à Product Information at www.johansondesign.com
