

Acti'Fit

(technical specification)

J37200

- 1- **The 125mm diameter post** is made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance. The cap is made of painted aluminium.

- 2- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

- 3- **The fixing elements** are made of painted aluminium.

- 4- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

- 5- **The framework** is made of galvanised steel.

- 6- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

7- **The trampoline surface** is made up of a series of straps, reinforced with steel cables; the straps are joined to the frame by steel springs.

8- **The tiles** are made from 30mm thick Euroflex rubber.

9- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
